CRediT authorship contribution statement

Ercan Erkalkan: Conceptualization, Methodology, Software, Validation.
Formal analysis, Investigation, and Data curation.
Writing—original draft, Writing—review & editing, and Visualization.

Funding

This research received no specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Declaration of competing interest

The author declares that there are no known competing financial interests or personal relationships that could have influenced the work reported in this article.

*Corresponding author. E-mail: ercan.erkalkan@marmara.edu.tr; ORCID: <https://orcid.org/0000-0001-9259-7112>

Data and code availability

Code, configurations, simulated benchmark data, the derived real-flight trace, and generated artifacts are available from the following records:

Repository: <https://github.com/ErcanErkalkan/FANET-TopoGNN>

Software archive: <https://doi.org/10.5281/zenodo.20226053>

Source forestry field dataset (CC BY 4.0):

An author-identifying-metadata-free copy is supplied separately for double-anonymous review.

Declaration of generative AI and AI-assisted technologies

During manuscript preparation, the author used OpenAI GPT-based tooling for language refinement and local reproducibility cross-checks. The author reviewed and verified the resulting manuscript and code changes and takes responsibility for the submitted work.
